

March 6, 1974

a rent increase, about December after the original budget recommendation had been presented. Six and seven deal with the O.K. six and seven have to do with the Board of Nursing to determine as you can see in the language there as to whether they should become a part of the Department of Health. You will find throughout the next budget bill that are presented that there are several paragraphs that are encouraging departments to begin a little more planning than they have done in the past. And number seven which requires the same planning assignment for the Department of Economic Development. Eight through ten, through twelve, I'm sorry, are corrective amendments. Number thirteen adds additional money for the Department..for the sub-section of the Legislative Council of Governmental expenditures. Number fourteen adds general funds to the Department of Labor in the area of employees safety. Numbers fifteen and sixteen remove duplicate funds required to expand the State Laboratory. And the funds are to be operated..to operate the laboratory are directly now the responsibility of the Department of Administrative Services. So hopefully so hopefully we don't have any more problems in this particular area. Seventeen and eighteen are corrections to salary adjustment calculations, that we discussed the other day. Nineteen, combines three separate amendments to ETV, one Senator Fowler asked a question about before. Would add \$390,000 for rent. The next one would give the NETCHE Program which related to the Institution of higher education in the state \$99,450, and the third part of this will expand the library copies for the showing of the film, Nebraska for the People. The twentieth amendment adds \$6,000 to the Historical Society for Fort Robinson. And twenty one corrects a federal fund figure in the State Auditors office. Now, I renew my motion first of all to adopt these amendments to 997, Mr. President.

PRESIDENT: Are there any questions. Senator Fowler first, and then Senator Barnett.

SENATOR FOWLER: Senator Marvel, on amendment number 7, the five year plan for State Economic Development. I was wondering where this concept came from. I know countries that have five year plans. But I was wondering what exactly would see as a five year plan in the State of Nebraska for Economic Development. And what exactly would the state Department of Economic Development be able to do as far as listing an economic plan for the whole state. What would say it would involve? Would it be the total economy we are talking about, or just the offices functions. What are we really asking for?

SENATOR MARVEL: I think, Senator Fowler, what we are trying to ask each department. And I think the Department of Economic Development is an important aspect of this state planning. We are asking each department first of all, if I may generalize, and then give more specific. Each department is being asked to present a five year plan as to what they propose to do for the benefit of the state, and then this coming budget, in other this budget for the next fiscal year would be the first year of this long range plan. Now that is what we are asking each department to do. Specifically, then we'd ask the Department of Economic Development We ask of all what their present contributions are as far as the state is concerned. The clientele they serve. And who they propose to serve for the next five years to expand Economic Development. So we are narrowing the field as far as overall state wide plans are concerned. But we are trying to find out from the Department of Economic Development specifically what they propose to do to contribute to the upgrading of the economy of this state.
